## 1.0 INTRODUCTION TO THIS STANDARD

### 1.1 PURPOSE

This is important because it will:

- Support competitive, security and other business purposes and compliance with applicable laws.
- Prevent inadvertent disclosure of Confidential Information or Material Non-Public Information, which may expose the Company and its Employees to significant risk of investigation and litigation.

### 1.2 SCOPE

This Standard applies to all areas of CNOOC International's business.

### 1.3 INTENDED AUDIENCE

The intended audience for this Standard is detailed in the table below.

Information is considered to have been disclosed or published to the public if:

- (i) the information has been generally disclosed by means of a broadly disseminated news release (including press releases, securities filings), and
- (ii) public investors have been given a reasonable amount of time to analyze the information. Material Non-Public Information includes any information, positive or negative, that has not yet been made available or disclosed to the public and that might be of significance to an investor, as part of the total mix of information, in deciding whether to buy or sell stock or other securities. While it is not possible to define all categories of material information, examples of information that should be considered material are as follows:
